CareerObjective

Driven professional with a solid foundation in software quality assurance and testing, bringing strong analytical and problem-solving skills to ensure reliable and efficient software performance. Skilled in identifying, documenting, and tracking software defects, with hands-on experience in manual testing, test case design, and execution. Adept at collaborating with developers, product managers, and cross-functional teams to deliver user-focused, high-quality software solutions on time. Passionate about leveraging technical expertise and attention to detail to support innovation and continuous improvement in the tech industry.

Education

	Percentage
Surya Group Of Institutions,Vikravandi,Villupuram	
Diploma in ComputerScienceandEngineering-2025	79%
St. Joseph's HigherSecondarySchool	
Class 10th (SSLC)	65%

Projects

AI-Powered Mock Interview Platform (HIRE HUB)

Built a full-stack AI-based interview simulation platform using Angular and Node.js with structured Trial and multi-day Pro interview flows.

Implemented intelligent evaluation and dashboard features to analyze communication, confidence, and provide actionable feedback.

Based water pump controller | Arduino, GSM

- To design and implement -based water pump controller for efficient and remote management of water pumping systems.
- The objective is to enable automated operation and monitoring, reducing manual effort and ensuring optimal water usage in agricultural and domestic applications.

Identification of Sudden Cardiac Arrest Risk Factors Machine Learning Using Residual Neural Networks

- To develop a robust system for identifying sudden cardiac arrest risk factors by analyzing using Residual Neural Networks.
- The objective is to leverage advanced deep learning techniques to enhance early detection and prevention, contributing to improved patient outcomes and healthcare innovation.

Web Based Online Crime Prediction

- Web-based online crime prediction is an innovative approach that utilizes historical crime data and predictive analytics to forecast potential criminal activities.
- project involves collecting and analyzing crime-related information from various sources, applying Machine learning or statistical models to identify patterns, and building a web-based.

Skills

☐ Manual Testing

Strong understanding of SDLC, STLC, AGILE.

Strong understanding of BLACK BOX (SMOKE,FUNCTIONAL,INTEGRATION,SYSTEM)TESTING

QA-QS

☐ Devlopment skills

☐ python

☐ UI/UX

☐ Java

☐ C#

☐ SQL

☐ AZURE AI FOUNDRY

Area of interest: Machine Learning (ML), Data Science

INTERNSHIPS:

Full Stack Developer Intern (Python)

Company: Retech Solutions

Duration: March 2025 – May 2025 (3 Months)

- Developed dynamic and responsive full-stack web applications using Python (Flask), HTML, CSS, and JavaScript.
- Designed and implemented RESTful APIs to enable seamless communication between frontend and backend systems.
- Built and managed CRUD (Create, Read, Update, Delete) functionalities for handling user and application data efficiently.
- Integrated frontend UI with backend logic, ensuring smooth data flow and real-time updates.
- Worked extensively with databases to store, retrieve, and manipulate structured data.
- Designed clean and user-friendly UI/UX interfaces to enhance user experience.
- Debugged and fixed application issues, improving performance and reliability.
- Participated in real-time project development, understanding industry workflows and best practices.
- Implemented form validation and error handling for better data accuracy and security.

Full Stack Developer Intern (MERN Stack)

Company: Harxa Tech, Vandalur

Duration: [Month Year – Present]

- Developed dynamic and responsive full-stack web applications using React.js, Node.js, Express.js, and MongoDB.
- Designed and implemented RESTful APIs for seamless communication between frontend and backend systems.
- Built and managed CRUD (Create, Read, Update, Delete) functionalities for efficient data handling.
- Integrated frontend UI components with backend logic, ensuring smooth data flow and real-time updates.
- Worked extensively with MongoDB for data modeling, storage, and retrieval optimization.
- Developed reusable and scalable UI components using React.js.
- Implemented authentication and authorization (JWT/session-based) for secure user access.
- Debugged and resolved application issues, improving performance and reliability.
- Collaborated with team members in an Agile development environment.
- Implemented form validation, error handling, and API validation for better security and data accuracy.
